Biophysical Chemistry 53 (1995) 295–299

Biophysical Chemistry

Subject Index to Volume 53 (1995)

Additivity rule
Maleic acid copolymer; Ca^{2+} activity; Counter ion condensation; Ca^{2+} binding (Iida, S. (53) 219)

Agarose
Neutron scattering; Gels (Krueger, S. (53) 85)

Alcohols
Poly (L-glutamic acid); Coil–helix transition; Contact ion-pair; Alkaline earth metal cations (Satoh, M. (53) 207)

Alkaline earth metal cations
Poly (L-glutamic acid); Coil–helix transition; Contact ion-pair; Alcohols (Satoh, M. (53) 207)

Amphiphiles, small
Membrane proteins; Detergents; Neutron crystallography; Small angle scattering (Timmins, P. (53) 27)

Anthracene
Phospholipid probe; Self-association; Membrane model; Spectroscopy (light absorption) (Rodriguez, F. (53) 169)

Bistability
Oxidation of indole-3-acetic acid; Phenol inhibition mechanism; Reaction threshold; Modelling; Computer simulation (Krylov, S.N. (53) 213)

Ca^{2+} activity
Maleic acid copolymer; Counter ion condensation; Additivity rule; Ca^{2+} binding (Iida, S. (53) 219)

Ca^{2+} binding
Maleic acid copolymer; Ca^{2+} activity; Counter ion condensation; Additivity rule (Iida, S. (53) 219)

Channel gating
Sodium channel; Ferroelectric Curie–Weiss law; Order–disorder transition; Dielectric permittivity; Ferroelectric liquid crystals (Leuchtag, H.R. (53) 197)

Coil–helix transition
Poly (L-glutamic acid); Contact ion-pair; Alkaline earth metal cations; Alcohols (Satoh, M. (53) 207)

Cold neutrons
Densimetry; Neutron scattering; Salt solutions; NaCl, KCl (Bonneté, F. (53) 69)

Computer simulation
Oxidation of indole-3-acetic acid; Phenol inhibition mechanism; Reaction threshold; Bistability; Modelling (Krylov, S.N. (53) 213)

Configurational entropy
Proteoglycan; Polysaccharide; Swelling pressure; Volume exclusion; Mean field theory (Kovach, I.S. (53) 181)

Conformational change
Yeast phosphoglycerate kinase; Small-angle neutron scattering; Second virial coefficient; Radius of gyration (Henderson, S.J. (53) 95)

Contact ion-pair
Poly (L-glutamic acid); Coil–helix transition; Alkaline earth metal cations; Alcohols (Satoh, M. (53) 207)

Cosolvent interaction
Protein hydration; Nucleic acid hydration; Guanidinium chloride denaturation; Halophilic malate dehydrogenase (Eisenberg, H. (53) 57)

Counter ion condensation
Maleic acid copolymer; Ca^{2+} activity; Additivity rule; Ca^{2+} binding (Iida, S. (53) 219)

***C-phycocyanin* protein**
Neutron scattering; Structure factor; Transition (Bradley, K.F. (53) 37)

Critical micelle concentration
SDS–protein complex; Neutron scattering; SDS binding; Protein-decorated micelle (Ibel, K. (53) 77)

Denatured protein
Phosphoglycerate kinase; Small-angle neutron scattering; Polymer theory (Calmettes, P. (53) 105)

Densimetry
Neutron scattering; Salt solutions; NaCl, KCl; Cold neutrons (Bonneté, F. (53) 69)

Detergents
Membrane proteins; Amphiphiles, small; Neutron crystallography; Small angle scattering (Timmins, P. (53) 27)

Deuterated-probes
DPH; TMA-DPH; Neutron-diffraction; Model membrane (Pebay-Peyroula, E. (53) 45)

Dielectric permittivity
Sodium channel; Ferroelectric Curie–Weiss law; Order–disorder transition; Ferroelectric liquid crystals; Channel gating (Leuchtag, H.R. (53) 197)

DNA curvature
Promoter structure; RNA polymerase (Nair, T.M. (53) 241)

DNA superstructures
Nucleosome positioning; *rbcS* genes; Theoretical prediction (Cacchione, S. (53) 267)

DNA torsional dynamics
Fluorescence polarisation anisotropy; Frequency modulation; Hoechst 33258; Ethidium (Collini, M. (53) 227)

DPH
TMA-DPH; Neutron-diffraction; Deuterated-probes; Model membrane (Pebay-Peyroula, E. (53) 45)

Dynamics
Interactions in protein; Inelastic neutron scattering (Smith, J.C. (53) 131)

EF-Tu · GTP · aminoacyl-tRNA complex
Neutron scattering; Isotopic substitution (Serdyuk, I.N. (53) 123)

Electrospray ionization mass spectrometry
Protein perdeuteration; Neutron diffraction; *Staphylococcal* nuclease (Gamble, T.R. (53) 15)

Enzyme control coefficients
Metabolic channelling; Matrix method (Kholodenko, B.N. (53) 247)

EPR of type 2 copper
Fluoride inhibitor; Freezing effects, Glycerol; Inhibitor; Subzero incubation method; Tree laccase (Miller, C. (53) 189)

Escherichia coli
Molecular chaperone; GroEL; Model analysis; Solution X-ray scattering (Igarashi, Y. (53) 259)

Ethidium
Fluorescence polarisation anisotropy; Frequency modulation; DNA torsional dynamics; Hoechst 33258 (Collini, M. (53) 227)

Ferroelectric Curie–Weiss law
Sodium channel; Order–disorder transition; Dielectric permittivity; Ferroelectric liquid crystals; Channel gating (Leuchtag, H.R. (53) 197)

Ferroelectric liquid crystals
Sodium channel; Ferroelectric Curie–Weiss law; Order–disorder transition; Dielectric permittivity; Channel gating (Leuchtag, H.R. (53) 197)

Fluorescence polarisation anisotropy
Frequency modulation; DNA torsional dynamics; Hoechst 33258; Ethidium (Collini, M. (53) 227)

Fluoride inhibitor
EPR of type 2 copper; Freezing effects, Glycerol; Inhibitor; Subzero incubation method; Tree laccase (Miller, C. (53) 189)

Freezing effects, Glycerol
EPR of type 2 copper; Fluoride inhibitor; Inhibitor; Subzero incubation method; Tree laccase (Miller, C. (53) 189)

Frequency modulation
Fluorescence polarisation anisotropy; DNA torsional dynamics; Hoechst 33258; Ethidium (Collini, M. (53) 227)

Gels
Neutron scattering; Agarose (Krueger, S. (53) 85)

GroEL
Molecular chaperone; Escherichia coli; Model analysis; Solution X-ray scattering (Igarashi, Y. (53) 259)

Guanidinium chloride denaturation
Protein hydration; Nucleic acid hydration; Cosolvent interaction; Halophilic malate dehydrogenase (Eisenberg, H. (53) 57)

Guinier approximation
Neutron scattering; Ribosomal structure; Ribosomal proteins; Ribosomal assembly; Reconstitution of ribosomes (Nowotny, P. (53) 115)

Halophilic malate dehydrogenase
Protein hydration; Nucleic acid hydration; Cosolvent interaction; Guanidinium chloride denaturation (Eisenberg, H. (53) 57)

Hoechst 33258
Fluorescence polarisation anisotropy; Frequency modulation; DNA torsional dynamics; Ethidium (Collini, M. (53) 227)

Hydrogen bond
Inelastic neutron scattering; Infrared; Raman; Proton transfer (Fillaux, F. (53) 155)

Image plate
Protein crystallography; Neutron position-sensitive detection (Cipriani, F. (53) 5)

Inelastic neutron scattering
Interactions in protein; Dynamics (Smith, J.C. (53) 131)

Infrared; Raman; Hydrogen bond; Proton transfer (Fillaux, F. (53) 155)

Infrared
Inelastic neutron scattering; Raman; Hydrogen bond; Proton transfer (Fillaux, F. (53) 155)

Inhibitor
EPR of type 2 copper; Fluoride inhibitor; Freezing effects, Glycerol; Subzero incubation method; Tree laccase (Miller, C. (53) 189)

Interactions in protein
Dynamics; Inelastic neutron scattering (Smith, J.C. (53) 131)

Isotopic substitution
Neutron scattering; EF-Tu · GTP · aminoacyl-tRNA complex (Serdyuk, I.N. (53) 123)

Maleic acid copolymer
Ca^{2+} activity; Counter ion condensation; Additivity rule; Ca^{2+} binding (Iida, S. (53) 219)

Matrix method
Metabolic channelling; Enzyme control coefficients (Kholodenko, B.N. (53) 247)

Mean field theory
Proteoglycan; Polysaccharide; Swelling pressure; Configurational entropy; Volume exclusion (Kovach, I.S. (53) 181)

Membrane model
Anthracene; Phospholipid probe; Self-association; Spectroscopy (light absorption) (Rodriguez, F. (53) 169)

Membrane potential
Microcalorimetry; Thermodynamics (Pu, R.Y. (53) 283)

Membrane proteins
Detergents; Amphiphiles, small; Neutron crystallography; Small angle scattering (Timmins, P. (53) 27)

Metabolic channelling
Matrix method; Enzyme control coefficients (Kholodenko, B.N. (53) 247)

Microcalorimetry
Membrane potential; Thermodynamics (Pu, R.Y. (53) 283)

Model analysis
Molecular chaperone; GroEL; Escherichia coli; Solution X-ray scattering (Igarashi, Y. (53) 259)

Modelling
Oxidation of indole-3-acetic acid; Phenol inhibition mechanism; Reaction threshold; Bistability; Computer simulation (Krylov, S.N. (53) 213)

Model membrane
DPH; TMA-DPH; Neutron-diffraction; Deuterated-probes (Pebay-Peyroula, E. (53) 45)

Molecular chaperone
GroEL; Escherichia coli; Model analysis; Solution X-ray scattering (Igarashi, Y. (53) 259)

NaCl, KCl
Densimetry; Neutron scattering; Salt solutions; Cold neutrons (Bonneté, F. (53) 69)

Neutron crystallography
Membrane proteins; Detergents; Amphiphiles, small; Small angle scattering (Timmins, P. (53) 27)

Neutron diffraction
Protein perdeuteration; *Staphylococcal* nuclease; Electrospray ionization mass spectrometry (Gamble, T.R. (53) 15)

Neutron-diffraction
DPH; TMA-DPH; Deuterated-probes; Model membrane (Pebay-Peyroula, E. (53) 45)

Neutron position-sensitive detection
Protein crystallography; Image plate (Cipriani, F. (53) 5)

Neutron scattering
C-phycocyanin protein; Structure factor; Transition (Bradley, K.F. (53) 37)

Densimetry; Salt solutions; NaCl, KCl; Cold neutrons (Bonneté, F. (53) 69)

SDS–protein complex; Critical micelle concentration; SDS binding; Protein-decorated micelle (Ibel, K. (53) 77)

Gels; Agarose (Krueger, S. (53) 85)

Ribosomal structure; Ribosomal proteins; Ribosomal assembly; Reconstitution of ribosomes; Guinier approximation (Nowotny, P. (53) 115)

Isotopic substitution; EF-Tu · GTP · aminoacyl-tRNA complex (Serdyuk, I.N. (53) 123)

Nucleic acid hydration
Protein hydration; Cosolvent interaction; Guanidinium chloride denaturation; Halophilic malate dehydrogenase (Eisenberg, H. (53) 57)

Nucleosome positioning
DNA superstructures; *rbcS* genes; Theoretical prediction (Cacchione, S. (53) 267)

Order–disorder transition
Sodium channel; Ferroelectric Curie–Weiss law; Dielectric permittivity; Ferroelectric liquid crystals; Channel gating (Leuchtag, H.R. (53) 197)

Oxidation of indole-3-acetic acid
Phenol inhibition mechanism; Reaction threshold; Bistability; Modelling; Computer simulation (Krylov, S.N. (53) 213)

Phenol inhibition mechanism
Oxidation of indole-3-acetic acid; Reaction threshold; Bistability; Modelling; Computer simulation (Krylov, S.N. (53) 213)

Phosphoglycerate kinase
Denatured protein; Small-angle neutron scattering; Polymer theory (Calmettes, P. (53) 105)

Phospholipid probe
Anthracene; Self-association; Membrane model; Spectroscopy (light absorption) (Rodriguez, F. (53) 169)

Poly (L-glutamic acid)
Coil–helix transition; Contact ion-pair; Alkaline earth metal cations; Alcohols (Satoh, M. (53) 207)

Polymer theory
Denatured protein; Phosphoglycerate kinase; Small-angle neutron scattering (Calmettes, P. (53) 105)

Polysaccharide
Proteoglycan; Swelling pressure; Configurational entropy; Volume exclusion; Mean field theory (Kovach, I.S. (53) 181)

Promoter structure
DNA curvature; RNA polymerase (Nair, T.M. (53) 241)

Protein crystallography
Neutron position-sensitive detection; Image plate (Cipriani, F. (53) 5)

Protein-decorated micelle
SDS–protein complex; Neutron scattering; Critical micelle concentration; SDS binding (Ibel, K. (53) 77)

Protein hydration
Nucleic acid hydration; Cosolvent interaction; Guanidinium chloride denaturation; Halophilic malate dehydrogenase (Eisenberg, H. (53) 57)

Protein perdeuteration
Neutron diffraction; *Staphylococcal* nuclease; Electrospray ionization mass spectrometry (Gamble, T.R. (53) 15)

Proteoglycan
Polysaccharide; Swelling pressure; Configurational entropy; Volume exclusion; Mean field theory (Kovach, I.S. (53) 181)

Proton transfer
Inelastic neutron scattering; Infrared; Raman; Hydrogen bond (Fillaux, F. (53) 155)

Radius of gyration
Yeast phosphoglycerate kinase; Small-angle neutron scattering; Second virial coefficient; Conformational change (Henderson, S.J. (53) 95)

Raman
Inelastic neutron scattering; Infrared; Hydrogen bond; Proton transfer (Fillaux, F. (53) 155)

Reaction threshold
Oxidation of indole-3-acetic acid; Phenol inhibition mechanism; Bistability; Modelling; Computer simulation (Krylov, S.N. (53) 213)

Reconstitution of ribosomes
Neutron scattering; Ribosomal structure; Ribosomal proteins; Ribosomal assembly; Guinier approximation (Nowotny, P. (53) 115)

Ribosomal assembly
Neutron scattering; Ribosomal structure; Ribosomal proteins; Reconstitution of ribosomes; Guinier approximation (Nowotny, P. (53) 115)

Ribosomal proteins
Neutron scattering; Ribosomal structure; Ribosomal assembly; Reconstitution of ribosomes; Guinier approximation (Nowotny, P. (53) 115)

Ribosomal structure
Neutron scattering; Ribosomal proteins; Ribosomal assembly; Reconstitution of ribosomes; Guinier approximation (Nowotny, P. (53) 115)

RNA polymerase
DNA curvature; Promoter structure (Nair, T.M. (53) 241)

Salt solutions
Densimetry; Neutron scattering; NaCl, KCl; Cold neutrons (Bonneté, F. (53) 69)

SDS binding
SDS–protein complex; Neutron scattering; Critical micelle concentration; Protein-decorated micelle (Ibel, K. (53) 77)

SDS–protein complex
Neutron scattering; Critical micelle concentration; SDS binding; Protein-decorated micelle (Ibel, K. (53) 77)

Second virial coefficient
Yeast phosphoglycerate kinase; Small-angle neutron scattering; Conformational change; Radius of gyration (Henderson, S.J. (53) 95)

Self-association
Anthracene; Phospholipid probe; Membrane model; Spectroscopy (light absorption) (Rodriguez, F. (53) 169)

***rbcS* genes**
DNA superstructures; Nucleosome positioning; Theoretical prediction (Cacchione, S. (53) 267)

Small-angle neutron scattering
Yeast phosphoglycerate kinase; Second virial coefficient; Conformational change; Radius of gyration (Henderson, S.J. (53) 95)

Denatured protein; Phosphoglycerate kinase; Polymer theory (Calmettes, P. (53) 105)

Small angle scattering
Membrane proteins; Detergents; Amphiphiles, small; Neutron crystallography (Timmins, P. (53) 27)

Sodium channel
Ferroelectric Curie–Weiss law; Order–disorder transition; Dielectric permittivity; Ferroelectric liquid crystals; Channel gating (Leuchtag, H.R. (53) 197)

Solution X-ray scattering
Molecular chaperone; GroEL; Escherichia coli; Model analysis (Igarashi, Y. (53) 259)

Spectroscopy (light absorption)
Anthracene; Phospholipid probe; Self-association; Membrane model (Rodriguez, F. (53) 169)

***Staphylococcal* nuclease**
Protein perdeuteration; Neutron diffraction; Electrospray ionization mass spectrometry (Gamble, T.R. (53) 15)

Structure factor
C-phycocyanin protein; Neutron scattering; Transition (Bradley, K.F. (53) 37)

Subzero incubation method
EPR of type 2 copper; Fluoride inhibitor; Freezing effects, Glycerol; Inhibitor; Tree laccase (Miller, C. (53) 189)

Swelling pressure
Proteoglycan; Polysaccharide; Configurational entropy; Volume exclusion; Mean field theory (Kovach, I.S. (53) 181)

Theoretical prediction
DNA superstructures; Nucleosome positioning; *rbcS* genes (Cacchione, S. (53) 267)

Thermodynamics
Membrane potential; Microcalorimetry (Pu, R.Y. (53) 283)

TMA-DPH
DPH; Neutron-diffraction; Deuterated-probes; Model membrane (Pebay-Peyroula, E. (53) 45)

Transition
C-phycocyanin protein; Neutron scattering; Structure factor (Bradley, K.F. (53) 37)

Tree laccase
EPR of type 2 copper; Fluoride inhibitor; Freezing effects, Glycerol; Inhibitor; Subzero incubation method (Miller, C. (53) 189)

Volume exclusion
Proteoglycan; Polysaccharide; Swelling pressure; Configurational entropy; Mean field theory (Kovach, I.S. (53) 181)

Yeast phosphoglycerate kinase
Small-angle neutron scattering; Second virial coefficient; Conformational change; Radius of gyration (Henderson, S.J. (53) 95)

Solution X-ray scattering study on the chaperonin GroEL from *Escherichia coli*
Y. Igarashi, K. Kimura, K. Ichimura, S. Matsuzaki, T. Ikura, K. Kuwajima and H. Kihara (Japan) 25

Superstructural features of the upstream regulatory regions of two pea *rbcS* genes and nucleosomes positioning: theoretical prediction and experimental evaluation
S. Cacchione, M.A. Cerone, P. De Santis and M. Savino (Italy) 26

Enthalpy changes in the formation of the proton electrochemical potential and its components
R.Y. Pu, Y. Wang and C.-H. Chen (USA) 28

Erratum 29
